

Ruritan Community Building

This is the Plaque that hangs in the Mail Hallway at the Montgomery Ruritan Community Building. Shown here are Town Board Members, Ruritan Board, Attorney, Contractor, Consulting Engineer and who financed the Project.

Montgomery Ruritan Community Building, Built in 1977: Shown here is the Community Building that was built with a grant from the Federal Government and this building has served our Community well for meetings, weddings, social events and many other events for the community. That was the purpose in building this type of building so it could be of great service to our community. This building had an electrical fire about 30 years after it was built from one of the heating units but it was not a major fire and the building was completely cleaned and repainted. At the time this building was built it was one of the best facilities for holding these type of events. Since that time other communities have built community building much like this one.

Inside the Montgomery Ruritan Community Building: Shown here is the how the Building might be set up for one of the Wedding Receptions or Banquets held in the Community Building. The picture was taken when there were steel chairs and heavy tables. Now they have been replaced with white plastic table and chairs.

Wall of Frames, Autographed Pictures of Entertainers that have appeared at the Turkey Trot - Shown here is the Front Hallway of the Community Bldg. where autographed pictures of entertainers who have appeared at the Turkey Trot over the years.
